## DETAILED ACTION

1. Applicant's arguments filed on March 15<sup>th</sup>, 2006, with respect to claims 1-11 have been fully considered and are persuasive. The previous office action has been withdrawn.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Begum (US 6,758,215).
4. As to claim 1, Begum teaches a mask that comprises a panel having an inner side and an outer side and at least one fastener affixed to the panel for attaching the mask to a wearer, the respiratory mask further comprising at least one display originally visible on the outer side of the panel (see figures 1-6).
5. As to claim 2, Begum teaches a mask wherein the display comprises graphical matter (see figures 1-6).
6. As to claim 3, Begum teaches a mask wherein the display comprises text (see figures 2 and 6).
7. As to claim 4, Begum teaches a mask wherein the display comprises graphics and text (see figures 1-6 and column 3 lines 30-40).

8. **As to claims 5 and 6,** Begum teaches a mask wherein the graphics depicting a national flag and a smiling face. (**One column 2 lines 40- 45** Begum states that the markings in the form of amusing (a smiling face or a national flag)).

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

11. Claims **8 through 11** are rejected under 35 U.S.C. 103(a) as being unpatentable over Begum (US 6,758,215).

12. **As to claims 8 through 11,** the applicant claims providing information regarding specified characteristics of the wearer in the at least one display of the mask. Begum states that the mask may be imprinted with markings in the form of informative graphics but fails to disclose what type of informative graphics. At the time of the invention was made, it would have been obvious to one having ordinary skill in the art to provide information graphics that contain specific characteristics of the wearer such as information regarding the servility/symptoms of the

medical condition of a patient wearer of the mask or the qualifications of a medical professional wearer of the mask. Therefore it would have been obvious to modify Begum's invention by providing information graphics that contain specific characteristics of the wearer such as information regarding the servility/symptoms of the medical condition of a patient wearer of the mask or the qualifications of a medical professional wearer of the mask so that the wearer of the mask gets the proper treatment.
